

Exchange it

To play the *Exchange it* game each player will need a grid and paper cut out dollar coins and ten dollar banknotes. Take turns to:

1. Roll a die and place that number of paper dollar coins on a row of the grid. When one row is full continue onto another row.
2. When you have a row of ten dollar coins exchange these for a 'ten dollar banknote' and remove the coins. The winner is the player with the most money when playing time is over. You will need to count by tens for the ten dollar banknotes and by ones for the remaining dollars.
